## REASONS FOR ALLOWANCE

- The following is an examiner's statement of reasons for allowance: The present invention is directed towards a method and apparatus for decompressing image data. The closest prior art, Maeda et al. (USPN 5,341,441), shows a similar system, in which, a coding apparatus divides digital image information into pixel blocks each having a size of m by n pixels, and subjects the image information to vector quantization in block units, wherein the pixel blocks are orthogonally transformed and the characteristics and sequency components of the pixel blocks are detected. However, Maeda et al. fail to address: "for decoding a vector quantized encoded image, such that output image color space processing is performed in combination with the decoding, resulting in the decoding being performed with a second codebook". This distinct feature has been added separately to all independent claims and render them allowable.

- Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
